HIGH-ALERT MEDICATIONS

The GOVERNING BODY together with the MEMBERS of the Medical Staff agreed on the following medications as HIGH-ALERT MEDICATIONS:

The following list is based on our review from ISMP'S list of HIGH ALERT MEDICATIONS in which our organization chose the common medications we might encounter. The list will be reviewed yearly and will be subject for addition, or revision depending on how our organization will remain safe regarding medications:

BEWARE OF THE FOLLOWING LIST OF HIGH ALERT MEDICATIONS:

1. Narcotics/Opiates
2. Anticoagulant (Warfarin)
3. Antidiabetic (insulin, all formulations)

These medications bear a heightened risk of causing significant harm when they used in error. To all our clinicians, please make aware of this list and ways to prevent errors, monitoring of patients
